

Vamsi Chilukuri

Senior Software Engineer | Full Stack Engineer

Bangalore, Karnataka | 9666983676 | vamsifullstackdev@gmail.com

LinkedIn: <https://www.linkedin.com/in/vamsi-chilukuri-897b15197>

Professional Summary

Software Engineer with ~6 years of experience building enterprise web applications using React, Next.js, TypeScript, JavaScript, Node.js and Express.js. Experienced in frontend architecture, SSR, authentication, reusable component libraries, AWS Cognito, performance optimization, production support, and full-stack development. Earlier experience includes AWS EC2, S3, Docker, Kubernetes, MongoDB Replica Sets, Nginx and deployment automation.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS

Frontend: React, Next.js, Redux, Context API, Material UI

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL (working knowledge)

Cloud/DevOps: AWS EC2, S3, Cognito, Docker, Kubernetes, Nginx, Git

Concepts: SSR, RBAC, Authentication & Authorization, Performance Optimization, Lazy Loading, Memoization

Professional Experience

I-Pangram Digital Services LLP

Fullstack Developer | July 2020 – Present

- Working on long-term FinTech client engagement (Wonderlend Hubs) since Dec 2021, contributing to 10+ enterprise portals.
- Designed and implemented centralized authentication using AWS Cognito for multiple configuration portals.
- Built reusable internal npm packages for shared UI components and centralized API utilities.
- Developed enterprise features including dashboards, RBAC, user/role/hierarchy management, dynamic forms, reports, audit logs, import/export and file upload.
- Migrated legacy rich text editor implementation to Lexical to address security vulnerabilities.
- Improved application performance through lazy loading, memoization and shared state management.
- Built PDF export functionality with custom layouts from frontend data.
- Served as the go-to engineer for debugging, production issue resolution and complex frontend problems.

- Performed code reviews, mentored developers, collaborated with client product managers, and participated in sprint planning and estimations.
- Earlier built full-stack applications, REST APIs, Dockerized services, configured MongoDB Replica Sets, manually set up Kubernetes clusters on AWS EC2, configured Nginx/DNS/CNAME, and deployed applications to EC2 and S3.

Leadership & Recognition

- Conducted internal workshops on Docker, Kubernetes, API fundamentals, databases and code coverage techniques.
- Employee Appreciation Award (2021)
- Certificate of Appreciation (2021)

Education

B.Tech, Information Technology

QIS College of Engineering and Technology (2020)

Additional Information

Data Structures & Algorithms: Intermediate

Notice Period: 30–60 Days
